

1.- Trace two circumferences with **radius 15 mm**, tangent to given one on **T**.

2.- Draw two tangent lines to given circumference, parallel to direction **d**.

3.- Trace two tangent lines to circumference **O** from outer point **P**.

4.- Draw two tangent, concentric circumferences to given ones **O** and **O<sub>1</sub>** (they have the same radius). **T** is one of the tangent dots.
